SUMMARY

Final-year CEIT (Computer Education and Instructional Technology) student at METU, graduating in January 2027, interested in the intersection of technology, engineering, and business. I aim to build my career in roles connecting customer needs with sales, operations, and project processes. My experience in the U.S. through the Work & Travel program strengthened my communication, adaptability, and ability to work in dynamic. In my graduation project, I worked as a Business Analyst and UX/UI Designer, analyzing user needs, translating them into product requirements, and supporting testing and development, which strengthened my ability to connect business needs with technical solutions.

EXPERIENCE & PROJECT

SEO Intern - Simur Digital **Mar 2024 - Jun 2024**

- Actively utilized Google Search Console (GSC) to monitor site health, indexing status, and Core Web Vitals.
- Conducted in-depth site crawls using Screaming Frog to identify and report technical issues like broken links, missing meta tags, and title errors
- Prepared SEO-optimized copy and performed page translation while strategically integrating target keywords to support content localization efforts.

Digital Media Volunteer - Turkish Intelligence Foundation **Sept 2024 -Jun 2025**

- Managed the foundation’s online presence (Instagram, LinkedIn, Twitter), directly contributing to its digital footprint and public image. Designed content aligned with the organization's tone and target audience, a function related to digital footprint monitoring and brand awareness
- Designed visual and written posts aligned with the organization’s tone and target audience.
- Assisted a workshop instructor during the Intelligence and Talent Congress by coordinating logistics and supporting participant engagement.

Part-Time Student Assistant at METU - ISKUR Youth Program **Oct 2025 - May 2026**

- Organized academic data and prepared structured reports for faculty use
- Assisted with documentation, data compilation, and coordination within the Faculty of Education
- Supported faculty members with research-related information gathering and reporting tasks

Middle East Technical University Development Foundation– Instructional Support Intern **Oct 2025 - June 2026**

- Supported classroom activities under the guidance of experienced teachers
- Assisted in lesson preparation and instructional material development
- Gained hands-on experience in classroom management and student engagement

AI-Supported Learning Platform (Graduation Project) - Business Analyst & UX/UI Designer **Oct 2025- June 2026**

- Designed user flows, wireframes and high-fidelity Figma screens.
- Conducted user testing sessions and evaluated usability feedback.
- Collaborated with front-end and back-end developers to clarify feature requirements.
- Analyzed student activity data using SQL and visualized learning patterns via dashboards.
- Supported integration of AI-powered features.
